Do You Hear What I Hear?

Keeping Your Ears Healthy with Natural Remedies

Most of us take hearing for granted, but as we grow older many of us suffer from hearing loss. While only 18% of adults aged 45-64 suffer from hearing loss, 47% of adults over 75 have a hearing impairment. Currently, only one out of five people who could benefit from a hearing aid actually wear one.

Hearing loss is not the only health problem affecting our ears. Another common problem is tinnitus or ringing in the ears. In adults ages 65 and older in the US, 12.3% of men and nearly 14% of women are affected by tinnitus. In fact, roughly 25 million Americans have experienced ringing in the ears at one time or another.

Ear infections are another common ear problem. Three out of four children will experience at least one ear infection (otitis media) by age three. What is not well known is that antibiotics have virtually no benefit in otitis media, even though they are commonly prescribed for this problem.
